# What is needed to become a regional basic industry?

- Manage the entire or significant parts of a complex value chain
- Significant amount of start-ups
- Significant regional establishments of existing industries
- World-leading knowledge development
- Capital flows into the regionResources/people move into the region
- The industry is a significant part of the public's every day's life
- The regional brand is heavily strengthened by the industry
- Developed infrastructure in relevant value chain positions
- Structural capital not depending on individuals or single companies
- Public actors provide transparent and long-term conditions for business
- The return of investments is reinvested in the region
- Endurance over time
- Values generated from the regional value chain, are known and relevant for paying customers on a market
